

which the certification and/or consistency concurrence is sought. The section 404(b)(1) evaluation and environmental assessment or environmental impact statement should also address long-term maintenance dredging and disposal. District engineers should use the guidance at 40 CFR 230.80 to shorten environmental compliance processing time. The Corps of Engineers will be responsible for accomplishing or assuring environmental compliance requirements for all disposal areas. This does not preclude the adoption of other agencies NEPA documents in accordance with 40 CFR parts 1500 through 1508.

(b) The identification of disposal sites should include consideration of dredged material disposal needs by project beneficiaries. District engineers are encouraged to require local interests, where the project has a local sponsor, to designate long-term disposal areas.

§ 337.10 Supervision of Federal projects.

District engineers should assure that dredged or fill material disposal activities are conducted in conformance with current plans and description of the project as expressed in the SOF or ROD. Conditions and/or limitations required by a state (e.g., water quality certification), as identified through the coordination process, should be included in the project specifications. Contracting officers should assure that contractors are aware of their responsibilities for compliance with the terms and conditions of state certifications and other conditions expressed in the SOF or ROD.

PART 338—OTHER CORPS ACTIVITIES INVOLVING THE DISCHARGE OF DREDGED MATERIAL OR FILL INTO WATERS OF THE U.S.

Sec.

338.1 Purpose.

338.2 Activities involving the discharge of dredged or fill material into waters of the U.S.

AUTHORITY: 33 U.S.C. 1344.

§ 338.1 Purpose.

(a) The procedures of this part, in addition to the provisions of 33 CFR parts 335 through 337, should be followed when undertaking Corps operations and maintenance activities involving the discharge of fill material into waters of the U.S., except that the procedures of part 336 of this chapter will be used in those cases where the discharge of fill material is also the discharge of dredged material, i.e., beach nourishment, within banks disposal for erosion control, etc.

(b) After construction of Corps Civil Works water resource projects, certain operations and maintenance activities involving the discharge of fill material require evaluation under the CWA. These activities generally include lake-shore management, installation of boat ramps, erosion protection along the banks of navigation channels, jetty maintenance, remedial erosion control, etc. While these activities are normally addressed in the existing environmental impact statement for the project, new technology or unexpected events such as storms or high waters may require maintenance or remedial work not fully addressed in existing environmental documents or state permits. In determining compliance with the applicable environmental laws and regulations the district engineer should use the CWA exemptions at 404(f) and NEPA categorical exclusions to the maximum extent practicable. If the district engineer decides that the changes have not been adequately addressed in existing environmental documentation, the procedures of this part should be followed.

[53 FR 14920, Apr. 26, 1988]

§ 338.2 Activities involving the discharge of dredged or fill material into waters of the U.S.

(a) Generally, fill activities conducted by the Corps for operations and maintenance of existing Civil Works water resource and navigation projects are routine and have little, if any, potential for significant degradation of the environment. District engineers are encouraged to develop general authorizations in accordance with section

404 of the CWA and 104 of the ODA following the procedures of §337.5 of this chapter for categories of such routine activities. The general authorization should satisfy all compliance requirements including water quality certifications and, if applicable, coastal zone consistency determinations. For activities which are not conducive to the development of general authorizations or are more appropriately evaluated on an individual basis, the following procedures should be followed.

(b) A public notice should be issued using the procedures §337.1 of this chapter.

(c) Water quality certifications should be requested and, if applicable, coastal zone consistency determinations should be provided using the procedures of §336.1(b) (8) and (9) of this chapter.

(d) The discharge site should be specified through the application of the section 404(b)(1) guidelines.

(e) The procedures of 40 CFR part 230 should be used to determine the NEPA compliance requirements.

(f) The factors of §336.1(c) of this chapter should be followed when evaluating fill activities.

(g) Upon completion of all required coordination and after receipt of the necessary state certifications, the district engineer should prepare an SOF in accordance with §337.6.

[53 FR 14920, Apr. 26, 1988]

PART 384—INTERGOVERNMENTAL REVIEW OF DEPARTMENT OF THE ARMY CORPS OF ENGINEERS PROGRAMS AND ACTIVITIES

Sec.

384.1 What is the purpose of these regulations?

384.2 What definitions apply to these regulations?

384.3 What programs and activities of the Corps of Engineers are subject to these regulations?

384.4 [Reserved]

384.5 What is the Corps of Engineers' obligation with respect to federal interagency coordination?

384.6 What procedures apply to the selection of programs and activities under these regulations?

384.7 How does the Corps of Engineers communicate with state and local officials concerning its programs and activities?

384.8 How does the Corps of Engineers provide states an opportunity to comment on proposed federal financial assistance and direct federal development?

384.9 How does the Corps of Engineers receive and respond to comments?

384.10 How does the Corps of Engineers make efforts to accommodate intergovernmental concerns?

384.11 What are the Corps of Engineers obligations in interstate situations?

384.12 [Reserved]

384.13 May the Corps of Engineers waive any provision of these regulations?

AUTHORITY: E.O. 12372, July 14, 1982 (47 FR 30959), as amended April 8, 1983 (48 FR 15887); and sec. 401 of the Intergovernmental Cooperation Act of 1968, as amended (31 U.S.C. 6506).

SOURCE: 48 FR 29153, June 24, 1983, unless otherwise noted.

§384.1 What is the purpose of these regulations?

(a) The regulations in this part implement Executive Order 12372, "Intergovernmental Review of Federal Programs," issued July 14, 1982 and amended on April 8, 1983. These regulations also implement applicable provisions of section 401 of the Intergovernmental Cooperation Act of 1968.

(b) These regulations are intended to foster an intergovernmental partnership and a strengthened Federalism by relying on state processes and on state, areawide, regional and local coordination for review of proposed federal financial assistance and direct federal development.

(c) These regulations are intended to aid the internal management of the Corps of Engineers, and are not intended to create any right or benefit enforceable at law by a party against the Corps of Engineers or its officers.

§384.2 What definitions apply to these regulations?

Order means Executive Order 12372, issued July 14, 1982, and amended April 8, 1983 and titled "Intergovernmental Review of Federal Programs."

Responsible Corps official means a District Engineer, Division Engineer, or the Chief of Engineers, or a designated
